## Speedball® CALLIGRAPHY & ILLUSTRATION

Speedball's proud heritage for pen-making began in 1899, when the C. Howard Hunt Pen Company began manufacturing and distributing steel pens. Nearly two decades later, in 1913, Hunt sought to improve upon the functionality of the lettering tools of the day and joined forces with master letterers Ross F. George and William H. Gordon in 1913 to contrive and perfect a nib with a reservoir. It was nicknamed "Speedball" because of the efficiency of the pen, which cut working time in half.

The Speedball name has become synonymous with high-quality pen nibs. There are two different kinds of nibs: broad-edge and pointed, both can be inserted into Speedball pen holders. In addition, Speedball now proudly manufactures a suite of complementary products. From pen holders to dip inks & cleaners to calligraphy markers and fountain pens, Speedball offers the broadest range of supplies designed specifically for drawing & lettering work.

BROAD-EDGE + POINTED PEN NIBS

Whether you prefer a broad edge nib or are a pointed pen enthusiast, Speedball manufactures a nib that is precisely-crafted to suit your needs. Utilizing the same historically proven processes specifically catered to each individual nib’s design, Speedball takes painstaking measures to ensure that each of our nibs meets even the most discerning standards. We have a dedicated member of our Speedball family that hand-inspects all nibs, one by one, that passes through production, ensuring each nib is the quality our artists have come to expect.

NIBS

BROAD-EDGE NIBS

Manufactured to have a rigid, flat edge that produces thick and thin, ribbon-like strokes, broad edge nibs are most commonly associated with Italic, Monoline or Gothic alphabets. The triple-reservoir design of these pen nibs allow for increased ink capacity and extended, smooth, uninterrupted ink flow. Available in a range of sizes across three styles, A, B, and C. *C Style Pen Nibs are also available in Left-Handed versions.*

A-SERIES PEN NIBS

Patented in 1913 and introduced two years later, the A-Series nib is where it all started for Speedball. Featuring a nib that possesses a square tip, bent to form a “shoe,” A-Series nibs allow artists to create a uniform line with a single stroke. Most commonly used for Gothic, Monoline and Block Sans Serif.

The A-Series is available in (6) nib widths:

#003000	A0 SQUARE	BOXED
#0030010	A1 SQUARE	BOXED
#0030020	A2 SQUARE	BOXED
#0030030	A3 SQUARE	BOXED
#003004	A4 SQUARE	BOXED
#0030050	A5 SQUARE	BOXED

WAYS TO USE:

- Perpendicular to base line: Keeping shoe flat on surface; produces uniform stroke in any direction with squared beginnings/endings
- Held at angle: Achieves either diamond-shaped beginning/ending or a squared finished on a diagonal stroke
- Turned on back: Using broad, flat end; produces either letterforms with thicks and thins or serifs of uniform width

WHAT DO THE NUMBERS MEAN?

The smaller the number, the larger the nib width

B-SERIES PEN NIBS

The B-Series was developed shortly after the A-Series and launched in the 2nd Edition of The Speedball Textbook in 1916. Like the A-Series, the B-Series has a bent end to form a “shoe” to produce a uniform width line. Unlike its counterpart, the B-Series has a rounded finish, ideal for creating sans serif letters without thick and thin lines.

The B-Series is available in (9) nib widths:

#003010	B0 ROUND	BOXED
#003011	B1 ROUND	BOXED
#0030120	B2 ROUND	BOXED
#003013	B3 ROUND	BOXED
#003014	B4 ROUND	BOXED
#003015	B5 ROUND	BOXED
#003016	B6 ROUND	BOXED
#003017	B1/2 ROUND	BOXED
#003018	B5-1/2 ROUND	BOXED

WAYS TO USE:

The B-Series can be used for an array of monoline projects. Most commonly used to create the following:

- Monoline
- Versals
- “Built Up” letters
- Cartoons, uniform line drawings, borders

Tolga Girgin

Renowned calligrapher, Tolga Girgin, first made a splash in the calligraphic community with his three-dimensional anamorphic lettering works. Within the past decade, Tolga has developed a mastery of more classical calligraphy scripts and trusts the A-, B- and C-Series nibs to play a role in executing his exceptional broad edge techniques.

BROAD-EDGE NIBS

**C-SERIES PEN NIBS**  
The C- marked the third addition of Speedball series of nibs, with the line now representing the most popular of broad-edge offerings. This C-Series is a traditional broad-edge nib with great deal of flexibility. This flexibility was intended to have the same characteristics of ancient scribes’ reed pens, while offering a calligrapher a “close imitation of the finest small brush work.” The C-Series was developed to be held at a consistent pen angle that varies dependent upon alphabet.

The C-Series is available in (7) nib widths and is also available in left-handed construction:

#003020	C0 FLAT	BOXED
#0030210	C1 FLAT	BOXED
#0030220	C2 FLAT	BOXED
#0030230	C3 FLAT	BOXED
#003024	C4 / C5 FLAT	BOXED
#003025	C5 FLAT	BOXED
#003026	C6 FLAT	BOXED

LEFT-HANDED		
#003050	LC0 FLAT	BOXED
#0030510	LC1 FLAT	BOXED
#003052	LC2 FLAT	BOXED
#003053	LC3 FLAT	BOXED
#003054	LC4 FLAT	BOXED

- WAYS TO USE:**  
The C-Series can be used for most traditional calligraphic alphabets including:
- Roman
  - Carolingian
  - Italic
  - Blackletter (Gothic, Old English)
  - Uncial / Half Uncial
  - Foundational
