

speed

From inks, modifiers and fluids to squeegees & frames, Speedball leads the industry in creating products that combine superior performance with value. Whether you're just starting out with one of our all-in-one kits or are a screen printer wanting pro tools & accessories to your studio, Speedball is the only resource you need to find all things screen printing.

There are three primary means of producing a screen printed image, each one with their own features, benefits, and limitations.

## CUT PAPER STENCIL + VINYL

BEST FOR:

- Fast, graphic image-making
- Introducing yourself to the screen printing technique

## FEATURES:

This technique relies on cutting your stencil out of thin paper or vinyl. Given its simplicity, it requires the least amount of preparation, but paper stencils also allow for limited detail.

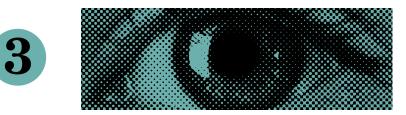

## **DRAWING FLUID & SCREEN FILLER**

BEST FOR:

- Hand-drawn or painted imagery
- Greater detail and control without need for exposure

## FEATURES:

Drawing fluid and screen filler work together to create a painted stencil. This is an effective technique for detailed handdrawn images, or images with a "painterly" quality.

## PHOTO EMULSION + SPEED SCREENS<sup>™</sup>

BEST FOR:

• Creating a photographic stencil of a pre-printed black and white image.

## FEATURES:

Photo emulsion allows for highest fidelity and detail. Almost anything you can print from a black and white printer you can expose as a photo stencil. Because of the specific tools and intricate steps, this is also the most complicated technique.

# **MEET THE ARTIST James Flames**

See it in action!

"I exclusively use Speedball's Acrylic Screen Printing Ink for all my printing. The saturation of the colors is second to none – they mix very well so that I can create very specific hues as well as regulate the opacity and transparency of the inks. The consistency is just right for screen printing – especially for me, since I still pull all my prints by hand. It's not too thin, not too thick, just right. "

> ARTWORK BY: JAMES FLAMES printed with Speedball Acrylic Screen Printing Inks

## SCREEN PRINTING INK AP

# FABRIC SCREEN PRINTING INK

Available in (25) rich colors, including fluorescent, Night Glo<sup>™</sup> and process colors, Speedball's Fabric Screen Printing Ink offers artists more vibrant colors, greater coverage, smoother workability, softer hand and easier cleanup than any other screen printing ink on the market. Inks print well on a range of fabrics, paper and cardboard. Washfast on textiles if properly heat set. Contains no offensive smell or solvents.

# SPEED SCREENS<sup>™</sup> KIT

Some sort of intro copy here. Maybe mention lamp - everything you need to create with the Photo Emulsion Method #3.

Set includes 30W LED Lamp, Red Baron Squeegee, 4oz (118ml) Fabric Screen Printing Ink (Black), (1) sheet of Black Paper, (3) Speed Screen sheets, Craft Stick, Instruction Guide, 8x10 in (20.3x25.4 cm) Wood Screen and Cord.

#004769

Once exposed, Speed Screens can be used to print by being corded and locked into an 8 x10 in (20.3 x 25.4 cm) frame or with the mesh sheets only. Highly durable, these screens can last for 100s of printing sessions!

3 PACK SPEED SCREENS™

Coated in a proprietary emulsion,

Speed Screens are ready- to-use

photographic stencils right from

your own printer.

#004767 3 SHEET PACK

mesh sheets that allow you to easily and quickly create permanent,

See how it works!
